

# Create Your Own Instrument

This week, we will create our own percussion instrument! When you're done, down at the bottom of the page are some Percussion Play-Along videos for you to jam with!

Percussion instruments are those that make sound by striking, tapping, shaking, or scraping.

- 1) Gather materials (with permission!) and experiment with different sounds.
- 2) Create and refine your instrument.
- 3) Play something on your instrument!
- 4) Share a photo or video demonstration of your instrument by emailing it to me at [vandenboomj@e-hps.net](mailto:vandenboomj@e-hps.net)

## Examples of homemade instruments

## Rhythmic Play Along Videos
